

Inclusive Digital Website Development

The digital media company Inclusive Digital offers a full design and development service for high quality, interactive websites – using the InclusiveProStream™ digital platform.

- The platform allows clients to stream text, images, videos, audio, and interactive content.
- We use a modular approach, which allows for clear and easy-to-navigate design and layout.
- Our websites have full search functionality, and content can be organised and accessed via a range of categories and filters.

The Jewel of Muscat interactive website – designed and developed by Inclusive Digital

- Our sites can include a range of interactive features – including comments, forums, ranking, 3D graphics, online questionnaires, and Ask a Question.
- The websites are linked to the Inclusive Content Management System (CMS) – with content uploading via panels and forms.
- The sites can be integrated with online membership and payment systems, and linked to related resources and online CPD/training modules and courses.
- Inclusive Digital works with a global Content Distribution Network and a secure third party payment company.
- InclusiveProStream™ can be managed by the client through the Inclusive CMS – or Inclusive Digital can offer a full end-to-end service, including text writing, image selection, uploading and CMS management.

InclusiveProStream™
